

Testimonials

Police Department - City of North Miami Beach

"... I have been in law enforcement for twenty-six years and have seen very little in regards to updating the way we test for those particular products, especially in police field applications. The new Stinger kit is truly revolutionary and I see great application, both in law enforcement and in the civilian world. I am very impressed with the ease of application and the security that the system has versus the current conventional system. I am also particularly fond of the overall strength and structure of the system itself, eliminating contamination or mistakes. The double testing, of course, is a criterion that we need to establish proper cause ..."

Florida, USA

Prof. E. Jungreis, Faculty of Science, Hebrew Uni. of Jerusalem

".. On January 21, 2000 I conducted an independent evaluation of IDenta`s newly developed field of drug testing kits to accurately identify suspected illegal substances.

Results :

In all cases the kits detected Cocaine/Crack and Heroine with no false positives nor false negatives.

The improved chemistry for Marijuana/Hashish enhanced the accuracy and speed of the results. The Test Device - used for all kits - is user and environmentally friendly, accurate and safe.

Summary :

In my opinion, these are the best chemical test kits on the market for primary screening of street drugs for Law Enforcement and Civil use."

Ervin Jungreis, Ph.D.
Professor Emeritus
Department of Inorganic Chemistry
The Hebrew University

Analytical Chemistry Laboratory, Israel Police Headquarters

"... The field testing kit is light weight and very easy to handle. Its design is novel. It also prevents reagent leakage and thus provides excellent protection for users.

The use of a combination of two consecutive tests increases considerably the test specificity when compared with other chemical field tests for heroine and cocaine/crack

In summary, the "IDenta" kit is recommended as a reliable drug screening test for police field units."

Dr. Zafrir Goren
Chief Superintendent
Head, Analytical Chemistry Laboratory
